

Festive Kick-Off for DevMcGill's 20 Years in Business!

Montreal, January 29, 2018 - DevMcGill kicked off the first of a series of activities which will highlight throughout 2018 the company's 20 years in business. A red carpet and banners marking this anniversary greeted the real estate developer's employees and main partners who took part in the event. Some 50 people, mimosa cocktail in hand, were present at the celebration of this twentieth anniversary.

"I am very pleased to see how DevMcGill has been able to adapt to the various social changes which have occurred during its existence and has always offered high-quality and ever-innovative products. I am taking this opportunity to thank our staff, our clients, our partners and our suppliers. The coming years should also be filled with their share of interesting challenges and we are ready for them" said Stéphane Côté, DevMcGill's President and Founder.

That's right! For 20 years now, DevMcGill has applied its talent and efforts to advance a bold vision of our construction heritage. In order to highlight this important event, a full calendar has been prepared to celebrate this pivotal year. Major activities will include promotions, contests, thematic reminders and historical reviews.

Living Spaces Forever Looking Forward

The sales revenue of DevMcGill's current projects totals \$577 million dollars. In the course of 20 years, the company has completed close to 50 commercial and residential projects as well as 2,193 housing units.

After the development of a large network of residential areas, major deals and exciting projects as well as rewarding accomplishments and a lot of hard work, a new chapter begins. What is left of our 20 years after, among others, the 100 McGill, Caverhill, the Outremont Convent, Benny Square, M9 and Castelnau? A great deal of passion, a sense of commitment, the respect for a job well done and a strong desire to keep going further.

From now on, supported by Cogir Real Estate, this desire to surpass ourselves will prove to be solidly entrenched.
